Bee Venom No.1 Beauty Trend of 2013

JWT Global Trend Analysts

Manuka Doctor is proud to announce 'Nature's Botox' Bee Venom has been forecast **the biggest beauty trend of 2013**, in the **Top 100 Things to Watch in 2013**

10 BEE VENOM

Bee venom therapy - an ancient practice dating back to Egypt, Greece and China - is experiencing a revivial. The practice, which involves systematically stinging patients sufferring from joint and nerve conditions such as arthritis and MS, is thought to help improve circulation, decrease inflammation and stimulate immune system responses. Beauty buffs are also turning to bee venom as a "natural Botox," with spas offering bee venom
company told The
that prices for New
over the past year.
